METAL STORAGEES

钢制存储系统

现代办公室的转型不仅使空间更具生产力,而且对用户和环境也更加积极。这就意味着办公家具现已经不能被视为简单的服务元素,而是要创建出多种空间解决方案。即使当下提倡无纸化办公概念,办公环境仍需要存储系统来实现资料的分类归纳,同时也可以起到装饰作用,或作为空间隔断等多种应用方式。多元化的存储系统可满足不同的办公需求,因此,我们为办公室、学校、档案室等不同领域不同场所提供更高效、更安全、更人性化的存储系统。

The trend of the modern office has not only made the space more productive, but also more positive for users and the environment. That means that office furniture can no longer be seen as a simple service element, but rather as creating multiple spatial solutions. Even if the current concept of paperless office is advocated, the office environment still needs a storage system to realize the classification and induction of data, but also to be a kind of decoration, or as a space partition and other applications. Diversified storage systems can meet different office needs. Therefore, we provide more efficient, more secure and more user-friendly storage systems for offices, schools, archives and other areas and places.

DEEP.10 系列为整装结构,顶板可拆卸、侧背板一体。柜体主要以优质冷轧钢板为基材,运用静电粉末喷涂技术和纳米陶化工艺,提高柜体的耐腐蚀性能、耐强撞力。使用意大利 SALVAGNINI 全自动折弯中心对钢板进行精准折弯,10mm 边框使传统钢柜更显轻盈,从而在视觉上消减柜体的厚重感。

The DEEP.10 series is a whole structure, the cabinet top can be disassembled and the side back plate has been integrated. The cabinet body is mainly made of high-quality cold-rolled steel plate as the base material, and the electrostatic powder coating technology and nano-ceramics process are used to improve the corrosion resistance and strong impact resistance of the cabinet body. SALVAGNINI automatic bending center of Italy guaranteed bend the steel plate accurately. The 10mm frame makes the traditional steel cabinet more light, so as to visually reduce the thickness of the cabinet.
